KAZAKH ZINC PLANT BEATS PLAN

The Ust'-Kamenogorsk Zinc Plant completed the 2-month plan for zinc output on 19 February. Only zero-grade zinc was produced. (From a letter to Shmyakhetov, secretary of the TsK KP(b) Kazakhstan, signed by N. Popov, acting director, Ust'-Kamenogorsk Zinc Plant; D. Dodin, secretary, Party bureau; and S. Mischenko, chairman, plant committee.)

Metallurgical workers of the Ust'-Kamenogorsk Zinc Plant fulfilled the 2-month production plan ahead of schedule. Ninety-seven percent of the metal produced was of superior grade, "zero," while the remaining zinc was of a higher grade, "extra." Workers of the chemical laboratory contributed to the high quality of the product by speeding up metal analysis.
